

587th ASRC Seminar

Date: 13:30 ~ , 9 March

Location: Meeting Room 302, ASRC Building

Speaker: Dr. Satoru Yamashita

(International Center for Elementary Particle Physics,
the University of Tokyo)

Title: Physics at International Linear Collider

A next generation electron-positron energy frontier collider, International Linear Collider (ILC) project, is under preparation with a large international collaboration. In this seminar, we mainly discuss physics opportunities expected at the project. Key technologies of the ILC accelerator and its detector complex, as well as the status of the project, are also introduced.
